Fold all cards along score lines and reinforce creases with a bone folder. Before making creases, check to make sure that all edges are aligned. The edges of many finished cards, panels and die cuts have been colored with ink. This step is optional, and the directions to ink edges are not included below. For a softer look, ink with a sponge or stylus tool with blender tip. For a bolder effect, ink directly from the pad onto the card. Prepare the 12x12 Black Cutaparts by trimming along the guidelines; remove the White Die Cuts from the parent sheet.

If you do not have the item required to complete the card, simply omit the step or substitute the item.
