Notes: Trim the 12x12 Sand Cutaparts along the guidelines, and separate the perforated squares into sections dictated by the artwork. Fold all cards along score lines and reinforce creases with a bone folder. Before making creases, check to make sure that all edges are aligned. The edges of many finished cards, panels and die cuts have been colored with ink. This step is optional, and the directions to ink edges are not included below. For a softer look, ink with a sponge or stylus tool with blender tip. For a bolder effect, ink directly from the pad onto the card. If you do not have an item required to complete a card, simply omit the step or substitute the item.

1. Mist the UM stamp with water and color with watercolor crayons. Stamp onto the Turquoise panel and repeat with additional colors. Allow the panel to dry.
 2. Stamp “Great Job!” onto the panel several times with Onyx ink. Note: Angled rows seem to work best and are more “forgiving” if you don’t stamp perfectly each time.
 3. Tie the ribbons onto the panel and layer the panel onto the card.

 2. Trim the pots from the Sand cutaparts with a scissors.
 3. Take the remaining portion of the Sand panel and make a 1/2" fold. Cut directly along the fold to create a stiff "stem" to put into the pot. Repeat to create several long stems.
 4. Trim the stems into assorted lengths and tape to the back of the pots. Secure the round pot to the card with one layer of foam adhesive. Use two layers of foam for the tall pot.
